

PRESS RELEASE

Düsseldorf, 16-23 October 2013

For immediate release

Radistrong®: RadiciGroup introduces its new long-fibre reinforced PA6 and PA6.6 specialities at K 2013.

COME AND SEE US – STAND B10 – HALL 06

At K 2013, the world's premier trade fair for plastics and rubber in Düsseldorf, RadiciGroup Plastics is showcasing:

■ **The new Radistrong speciality line of long-fibre reinforced PA6 and PA6.6 engineering plastics, ideal for metal replacement.**

RADISTRONG®: NEW HIGH-PERFORMANCE LONG-FIBRE ENGINEERING PLASTICS

Better impact strength, higher creep and fatigue resistance, and greater mechanical resistance and stiffness at high temperatures compared to conventional polyamides. These are the main advantages of the new long-fibre reinforced specialities introduced by RadiciGroup at the K 2013 trade fair.

Radistrong® specialities are available in nylon 6 and 6.6 versions and, due to their characteristics, are ideal for metal replacement in critical applications (with high operating temperatures or mechanical and thermal stress for long periods of time), where high performance, not attainable by traditional engineering plastics, is required.

The new Radistrong® long-fibre specialities are manufactured by pultrusion and are available with from 20% to 60% glass-fibre fill.

The main applications include ...

AUTOMOTIVE

- Pump housings
- Engine mounts
- Intercooler end caps
- Under-the-bonnet structural components

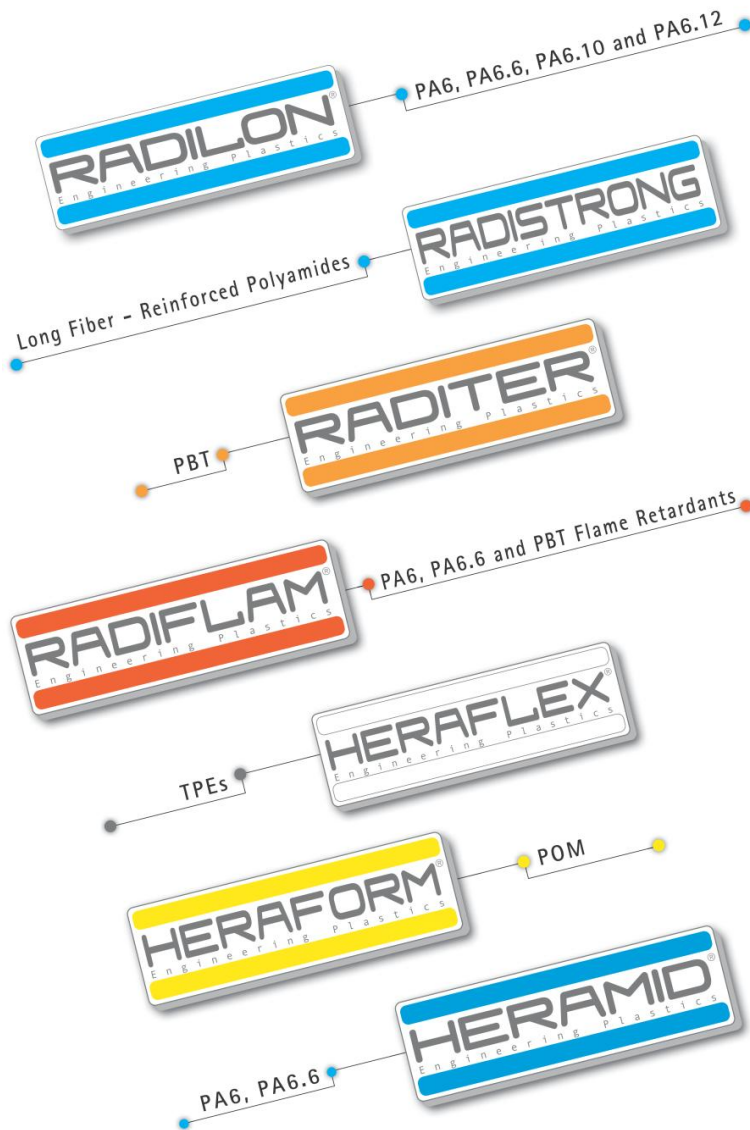

HOUSEHOLD
APPLIANCES

- Appliance hinges
