

-Radyarn®-

MICROFIBRE YARN

Radyarn® microfibre yarn is synonymous with quality thanks to consolidated technology and constant quality controls in production. Its possible combination with other natural and/or synthetic fibres enables to manufacture a **wide fabric range**, all these fabrics having a particularly **soft touch**, a **silken look** and a **better comfort** due to the lightness and the transpiration of these microfibre yarns. The latter's versatility allows uses in different fields of application, such as sportswear and furnishing.

AVAILABILITY

- ◉ **Textured spools** for weft or circular knitting.
- ◉ **Flat or textured warped** on knitting beams.
- ◉ **Flat or textured warped** on sized beams for weaving.

For any further detail about available counts, please see our Product List.
