

A sustainable vest for Maratona dles Dolomites cyclists

102,000 bottles

2,100 kg of Repetable® yarn

6,100 linear metres of fabric

10,000 vests

Whoever loves sport respects the environment: **Carvico** and **RadiciGroup** have contributed to the sustainability of the 2021 Maratona dles Dolomites. The two Italian textile manufacturers have joined competencies to develop and produce the vests worn by all competitors in the race. **Repetable® yarn from RadiciGroup** was used to make the **Carvico fabric** for the cycling vests. Repetable® is an innovative polyester yarn obtained from post-consumer recycling of plastic bottles, a process that cuts CO₂ emissions (-45%) and reduces usage of both water (-90%) and energy (-60%).
