

All round bio-circular

Chemical protective clothing.
Category III, Types 5-B and 6-B.

radipeople®

A sustainable world of protection

Types 5 and 6 offer the perfect synthesis between protection and comfort.

Key features

- High protection against liquids and particles.
- Precisely designed to maximize comfort and ergonomics.
- Three-panel hood for a better fit on the head and around the face.
- Antistatic treatment (in conformity with EN 1149-5:2008).
- Elastic around face opening and at wrists and ankles. Glued-in elastic waist.
- Sizes: S to XXL.

The main applications include: oil & gas industries, pharmaceuticals, chemicals, automotive, food (meat and fruit/vegetable processing) and numerous maintenance operations.

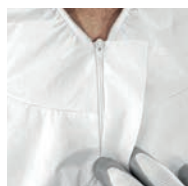

This is the bio-circular version of the garment, **ISCC PLUS (International Sustainability and Carbon Certification)**, in other words made from a fabric that uses non-fossil renewable resources (from a minimum of 66% to a maximum of 100%). The same protection levels as the traditional version are guaranteed, combining attention to people's health and safety with a firm commitment to safeguard the environment.

ISCC PLUS is a certification for **circular materials** that are allocated using the mass balance approach. It provides **traceability along the supply chain**, and ensures that certified companies are meeting the **high environmental and social standards**.
