

# 2012

## CHEMICALS

PA6 polymer for compounding, films and fibres; PA6,6 polymer for compounding, extrusion, films and fibres.

Adipic acid for the production of fibres, PA6,6 engineering plastics, polyurethanes, resins, plasticizers, lubricants, adhesives, additives, pharmaceuticals, insecticides and herbicides; HMDA, intermediate for polyamides and coatings; AGS, intermediate for polyesters and solvents; nitric acid for metallurgy, steel treatment, zinc-plating and chromium-plating (galvanic industry), machinery cleaning and disinfection (dairy industry) and nitrogen fertilizer production; KAoil; esters for biodegradable solvents, paint removers, cosmetics, detergents, coatings, plasticizers and chemical intermediates.

## PLASTICS

Range of PA6 and PA6,6 polymers and copolymers for injection moulding and extrusion in the industrial, electrical/electronics and automotive industries.

Range of polyester thermoplastics used in injection moulding for industrial, electrical/electronics and automotive applications.

Range of eco-compatible PA6 and PA6,6 products made with raw materials selected from RadiciGroup polymerization, spinning and compounding production rejects. Used in injection moulding and extrusion for industrial, electrical/electronics and automotive applications.

Thermoplastic elastomers; SEBS, SBS and elastomeric polyolefin (PE – PP) TPEs for innumerable application sectors, from sports equipment to technical footwear, furnishings and automotive.

Range of flame-retardant polyamides and polyesters used in injection moulding and extrusion for applications where high flame resistance is required, particularly in the electrical/electronics and automotive fields.

## FIBRES

Polyamide 6/6,6 and PP BCF yarn for domestic/residential, contract and automotive carpeting, coverings and upholstery.

High-tenacity yarn used for the production of technical items for sports, automotive and industrial applications.

Polyamide yarn and staple used for the production of technicalwear, sportswear and intimatewear, as well as household furnishings.

Raw, solution-dyed and additioned polyester yarn for numerous applications, from upholstery to curtains, sportswear, hygiene/medical and automotive.

Polyester microfibre available with permanent flame-retardant properties for indoor and outdoor furnishings, curtains, technicalwear and automotive applications.

Solution-dyed bacteriostatic nanostructured polyester for technicalwear, sportswear and hosiery.

PA/PET two-component yarn that gives fabrics an exceptionally soft hand; used in the sportswear and furnishings sectors.

Acrylic fibre and top for technicalwear, sportswear, knitwear and upholstery.

PP, PE and PA artificial grass yarn for sports pitches, recreational and domestic indoor and outdoor uses, including landscaping.

Raw-white and solution-dyed polyester yarn for apparel, household furnishings, automotive and technical/industrial applications.

PP nonwoven spunbond for numerous uses in the hygiene/medical, construction, furnishings and single-use markets.

## *Lisa and Ettore*

Engineers Lisa and Ettore are the Radicigroup sustainability champions, the stars of the cartoon that recounts the Group's Journey into sustainability which started in 2003.

They will accompany us through this year, and help us remember how important is attention to the use of resources, to energy saving, to a more eco-conscious lifestyle.

"Humanity has the ability  
to make development sustainable  
to ensure that it meets the needs  
of the present without compromising  
the ability of future generations  
to meet their own needs."
