PRESS RELEASE

BERGAMO, 15 JANUARY 2015

DOMOTEX 2015

Hannover 17-20 January

Come and see us: HALL 5 - STAND C32

RADIGREEN® at Domotex.

In Hannover, together with its 2015 Radifloor® BCF yarn collection and its portfolio of dorix® and radilon® staple fibre products, RadiciGroup is showcasing RADIGREEN® polyamide and polyolefin artificial grass yarn. Focus on: MY RADIGREEN® yarn and RADIGREEN® HD PE.

RADIGREEN® polyamide and polyolefin artificial grass yarn from Tessiture Pietro Radici

(TPR), an ancestral RadiciGroup company, is back once again at Domotex. The RADIGREEN® yarn range stands for quality, safety and high performance and has been developed to best meet customer expectations and requirements. Thus RADIGREEN® is the ideal solution for many different synthetic turf applications: from **landscaping** (residential and commercial indoor and outdoor artificial grass) to **sports** (football,

hockey, five-a-side football and rugby pitches; golf greens; and American football fields).

At Domotex FOCUS ON...

MY RADIGREEN®...

Specifically developed for residential, commercial and household synthetic turf, **MY RADIGREEN®** yarn is an exclusive “All In One” combination of straight and textured monofilaments that gives turf makers maximum colour and production flexibility and freedom to unleash their creativity.

Why use MY RADIGREEN® for residential and commercial buildings? Here is a short list of the main benefits: water savings - Minimal maintenance - No pesticides - Ever-green lawn - Creative customization.

RADIGREEN® HD PE...

RADIGREEN® HD PE is a yarn family for sports applications that Tessiture Pietro Radici has achieved through the use of high performance polymers and advanced production technology. It was designed to fulfil one of the primary needs of the synthetic turf sector: a fibre that lasts over time, keeping the turf's technical characteristics unchanged as long as possible and preventing degradation caused by the sun's radiation. Long life is a key requirement for artificial turf surfaces for sports such as football, golf, hockey, five-a-side football, American football and rugby. This kind of performance is ensured by RADIGREEN® HD PE, which was developed using an innovative fibrillation technology and special polymers specially designed to provide high tear-resistance. The distinctive Radigreen® HD PE characteristics include good weaveability, ease of installation and maintenance, and long-lasting high resistance to wear and tear.

RADIGREEN® HD PE yarn can withstand prolonged stress because of its self-twisting property, a helix effect that strengthens the yarn by increasing resilience and split resistance. RADIGREEN® HD PE yarn ensures a uniform and homogeneous playing surface with good resilience and ball roll.
