

Let's discover our PPE range in the bio-circular version

Coveralls and gowns
with different levels of protection according to the intended use.

Accessories such as **boots or shoe covers, hoods and caps.**

When safety meets sustainability

The products of the **Radipeople®** range are also available in the **"bio-circular" ISCC PLUS version**: garments that are made with a fabric coming from non-fossil **renewable resources**, in percentages ranging from a minimum of 66% to a maximum of 100%.

Of course, the same levels of protection as the "traditional" version are guaranteed.

With Radipeople®, attention to people's health and safety - which is one of the pillars of the Group's sustainability strategy - is therefore combined with a **strong commitment to environmental protection**.

What ISCC PLUS means for RadiciGroup

- Purchasing ISCC Plus certified raw material:
 - **Bio-circular polypropylene** (from the recovery of cooking oil and / or wood processing oil).
 - **Circular polypropylene** (coming from the mechanical or chemical recovery of raw materials of non-biological origin).
- Accounting for the raw material in the various stages of production in order to attribute the calculated share of vegetable and / or circular raw materials on an equivalent basis to one or more outputs (**Mass Balance Approach**).
- Constantly complying with the **certification** criteria, which are periodically checked by external auditors.
- Providing its customers with protective suits from **circular material**, supporting the transition to a **circular economy**.

ISCC PLUS, traceability and circularity

The company, actually, adheres to the **ISCC PLUS scheme**, the **International Sustainability and Carbon Certification**.

ISCC PLUS is a certification for **circular materials**, where the sustainable material is allocated via **mass balance** accounting. It provides **traceability** along the supply chain, verifying that certified companies meet high environmental and social standards. This allows to produce spunbond made from raw materials certified according to ISCC sustainability requirements.

Joining the ISCC PLUS Scheme means

- Supply chain **traceability**.
- **Transparent rules** for determining the mass balance and physical segregation.
- Clear attribution of the certified material by the means of the **mass balance**.
- **Identity** of the raw material.
- Certification criteria well defined and **verified by third parties**.
- **Deforestation reduction**.
- **Protection of biodiversity** and areas with a high concentration of flora.
