

Pro Socks

radipeople®

A sustainable world of protection

Chemical protective clothing.
Category III, Types 4-B, 5-B and 6-B.

Performance with comfort and ergonomics.

Key features

- Coveralls with integrated socks and boot flaps.
- Excellent barrier against dust and splashes.
- Protection against penetration of chemical sprays.
- Taped seams offering a protection barrier equivalent to the fabric itself.
- Antistatic treatment (in conformity with EN 1149-5:2008).
- Extremely heavy-duty yet lightweight coveralls, featuring an optimal compromise between protection and comfort.
- Self-adhesive chin flap for a tighter fit around a respirator, if needed.
- Elastic around face opening and at wrists and ankles. Glued-in elastic waist. Thumb loops to prevent the sleeves from riding up.
- Sizes: S to XXL.

The main applications include: maintenance, pharmaceutical manufacturing plants, research & development laboratories and medical facilities.

Self-adhesive zipper and chin flap

Elasticated waist (glued-in)
