

2013

CHEMICALS BUSINESS AREA

PA6 polymer for compounding, films and fibres; PA66 polymer for compounding, extrusion, films and fibres. PA6/66 copolymer for monofilament, films and extrusion.

Adipic acid for the production of fibres, PA66 engineering plastics, polyurethanes, resins, plasticizers, lubricants, adhesives, additives, pharmaceuticals, insecticides and herbicides; HMDA, intermediate for polyamides and coatings; AGS, intermediate for polyesters and solvents; nitric acid for metallurgy, steel treatment, zinc-plating and chromiumplating (galvanic industry), machinery cleaning and disinfection (dairy industry) and nitrogen fertilizer production; KAoil; esters for biodegradable solvents, paint removers, cosmetics, detergents, coatings, plasticizers and chemical intermediates.

PLASTICS BUSINESS AREA

A line of PA6, PA66 and 60% renewably sourced PA6.10 polymers and copolymers used for injection, extrusion and blow-moulding for applications in the industrial, electrical/electronic, and automotive sectors.

"Green" range of materials mainly coming from RadiciGroup's polymerization, fibres and compound plants scraps used for injection, extrusion and blow-moulding for applications in the industrial, electrical/electronic and automotive sectors.

A line of thermoplastic semi-crystalline PBT and glass fibre reinforced PBT used for injection moulding for applications in the industrial, electrical/electronic, and automotive sectors.

A line of thermoplastic elastomers based on SEBS, SBS and Co-polyesters used for injection and blow moulding for applications in the industrial, electrical/electronic and automotive sectors.

Recyclable and non toxic polyethylene-based infill for synthetic turf sports fields. Polypropylene based compound, glass fibre reinforced used for extrusion for applications in the automotive sector.

A line of PA and PBT flame retardant grades used for injection and extrusion for all applications where high fire resistance is required, especially in the electrical/electronic and automotive sectors.

■ SYNTHETIC FIBRES BUSINESS AREA ■

High-tenacity polyamide 66 yarn used for the production of technical items for sports, automotive and industrial applications.

Polyamide yarn and staple used for the production of fashionwear, technical-wear, sportswear and intimatewear, as well as household furnishings.

Polyamide 6 and 66 BCF yarn for domestic/residential, contract and automotive carpeting, coverings and upholstery.

industrial, apparel and carpeting sectors.

Raw, solution-dyed and additivated polyester yarn (flame retardant, bacteriostatic, UV protection) for numerous applications, from upholstery to curtains, sportswear, hygiene/medical and automotive.

Eco-sustainable polyester yarn produced from post-consumer recycled PET bottles; suitable for a vast range of applications from apparel to upholstery, automotive, technical and industrial applications.

Raw-white and solution or yarn dyed polyester, available in additivated versions (flame retardant, bacteriostatic, UV protection) and also as microfibre, supermicrofibre and bicomponent fibre (PA/PET) for apparel, household furnishings, automotive and technical/industrial applications.

r-Radyarn® Continuous polyester filament derived from post-consumer recycled polymer, it boasts high versatility as for its dope dyed, bacteriostatic, and UV stabilized versions. It can be used for a wide range of applications, from apparel, to home interiors to technical applications.

CRYLOR® Acrylic fibre and top for technicalwear, sportswear, knitwear and upholstery.

CorraLeaf® Solution-dyed yarn with antimicrobial functionality, made from Ingeo™ polylactic acid (PLA) 100% natural biopolymer. Derived from renewable sources, this product is suitable for apparel, intimatewear, furnishings and consumer goods.

RADIGREEN® PP, PE and PA artificial grass yarn for sports fields, recreational and domestic indoor and outdoor applications, including landscaping (gardens and urban design).

DYLAR® PP nonwoven spunbond for several uses in the roofing, hygiene, medical, automotive, furnishing and single-use markets.
