

DOMOTEX

## PRESS RELEASE

BERGAMO, 13 JANUARY 2015

### DOMOTEX 2015

Hannover 17-20 January

Come and see us: HALL 5 - STAND C32

## dorix® and radilon® staple fibre at Domotex.

---

*In Hannover, together with its 2015 Radifloor® BCF yarn collection, RadiciGroup is showcasing a more extensive range of dorix® and radilon® staple fibre polyamide 6 and 6.10 products.*

---

RadiciGroup returns to Domotex with a broader portfolio of dorix® and radilon® staple fibre

products: raw and solution-dyed PA6 and PA6.10 versions in a vast range of colours and counts. RadiciGroup staple products are made at the Radici Yarn SpA site in Italy and at Radici Chemiefaser GmbH in Germany and are ideal for the contract textile floor covering industry, especially for the manufacture of carpeting and needle-felt carpet for high performance applications where colourfastness and resistance to wear and tear are required.

After a more than satisfactory 2014 for dorix® and radilon® staple fibre in terms of both a stronger product portfolio and market share gain, RadiciGroup is planning to stay the course on higher quality, production flexibility and sustainability. These characteristics, together with excellent customization capability and a varied product offering, have always set the RadiciGroup

staple fibre range apart. Collaboration with downstream partners is always of central importance to

*dorix® and radilon® staple fibre at Domotex*

the Group, as are competence and know-how in the field of synthetic fibre production (from upstream polymerization down to the spinning and processing stages).

Today RadiciGroup is able to bring a more complete and varied range of staple products to the market. Not only PA6 staple in raw and solution-dyed versions, but also eco-sustainable PA6.10 products.

## **DORIX® AND RADILON® STAPLE FIBRE: IDEAL FOR CONTRACT APPLICATIONS, BUT NOT ONLY**

RadiciGroup nylon staple features characteristics that make it ideal not only for applications in the contract sector but also in other market segments, such as:

- TECHNICALWEAR / FASHIONWEAR
- AUTOMOTIVE
- INDUSTRIAL NONWOVENS – Nonwovens for technical applications such as interlinings, industrial filters and abrasives. For a couple of years now, RadiciGroup has been focusing on certain industrial applications for nonwovens, developing and optimizing its staple products specifically for these kinds of uses. The Group is now introducing a wide range of nylon 6 and 6.10 products with even better performance to its customers in this particular market segment.
